

SURVEYSTATION STATISTICAL REPORTS

Survey results are compiled into tabular and cross-tabular formats of field questions and demographic data, and are published in an MSWord file which with an MSExcel file of original respondent data is provided to the client for review and further custom analysis. A hard copy of the report– including color graphs – can be provided for an additional nominal fee.

All survey questions developed, data collected at the event by Cascade Survey Research, and the reports as derived from that data, are the exclusive property of the client and will be held in the strictest confidence by Cascade Survey Research.

Contact Cascade Survey Research to discuss the appropriate question development options that address your research and data reporting requirements.

The following questionnaire and data report has been derived from surveys completed by medical professionals at major events. The information and results have been modified to maintain confidentiality and exclusivity to the original client(s) and are provided as a sample for review in consideration of conducting market research with Cascade Survey Research.
